

HDMI 4K Version Cable

Overview

The MicroConnect High Speed HDMI with Ethernet cable supports the latest HDMI features according to specification 2.0. This cable complies with the latest standard "High Speed with Ethernet" and can transmit a bandwidth of 18Gbps, which is enough for resolutions up to 4096x2160p @ 60Hz. It is of course backwards compatible with all older HDMI specifications.

MicroConnect 2.0 HDMI cables is a safe investment in future-proof digital cabling and is perfectly suited for professional and B2b applications thanks to several EMI shielding's and full 18Gbps bandwidth.

Features

- Tested on TotalPhase advance cable tester 2 before shipment
- Support up to 4K with 60Hz
- Gold plated connectors
- Triple shielded to reduce EMI
- Audio Return Channel (ARC)
- Ethernet Channel (HEAC)
- HDMI 2.0 Version
- Conductor: high purity copper
- Approvals: RoHs 2.0, Reach, CE

Technical Specification

Model	<i>MC-HDM1919xxxV2.0</i>	Test	<i>Tested by TOTALPHASE Advanced Cable Tester 2 for HDMI2.0 18G.</i> <i>Support 4096x2160 60Hz 4:4:4 Support 60Hz DSC</i> <i>Tested by Nvidia GTX3080 ,TV 4096*2160 60HZ 4:4:4 or RGB 4:4:4 12bit pass.</i>
Length	<i>0,5m, 1m, 1,5m, 2m, 3m, 4m, 5m, 7,5m, 10m</i>		
Material	<i>PVC Cable</i>		
Shielding	<i>Triple shielded</i>	Warranty	<i>30 Years</i>
Common applications	<i>For signal between computer / notebook and monitor.</i> <i>Home Cinema</i> <i>AV installations</i>	Version	<i>HDMI 2.0</i>
		Testing	<i>Tested before shipment</i>
Colors	<i>Black</i>	Packing	<i>MicroConnect Polybag</i>
		Certifications	<i>CE, Reach, RoHs</i>
		Installation and use	<i>Plug and Play</i> <i>Indoor</i>
